COMPACT PRO | Belly Trimmer Automatic Belly Trimming for Maximum Yield

- Maximizes yield with precise trimming and minimal meat loss.
- Removes manual labor.
- Increases profit from by-products.
- Ensures uniform fillets.
- Compensates for uneven gutting and reduces manual rework.
- Multiple trimming modes for flexible processing.

Add-on for BE-5351 Compact Pro Filleting Machine.

Consistent Trimming. Reduced labor

The Compact Pro Belly Trimmer is developed as an integrated add-on to the BE-5351 Compact Pro Filleting Machine, automating a critical step in the filleting process. By ensuring consistent belly trimming, the system removes dependency on manual labor, saving the equivalent of up to two operators, while improving both yield and product quality.

compensates for these variations, delivering stable and repeatable results across different fish sizes and conditions.

With pre-set and adjustable trimming heights, the system ensures precise cuts with minimal meat loss while maintaining a consistent fillet profile.

Optimized Yield and By-Product Value

Variations in gutting and raw material can lead to uneven trimming and unnecessary loss. The belly trimmer

This not only improves primary product yield but also enhances the quality and value of by-products by ensuring clean, controlled cuts.

Design and Performance

Flexible Trimming Modes for Different Needs

The Compact Pro Belly Trimmer supports multiple trimming modes, allowing processors to adapt to different products and market requirements:

- ✓ **Profile Cut** follows the fish's outline, trimming with minimal loss of meat and fat, making it ideal for D-trim fillets.
- ✓ **ABC-Trim** removes only the pelvic fin while maintaining the natural fish profile.
- ✓ **Straight Cut** applies a pre-set trimming height to ensure a uniform fillet shape and optimized by-product value.

This flexibility makes it possible to tailor production to specific requirements while maintaining efficiency and consistency.

Model	Compact Pro Belly Trimmer
Capacity	Up to 25 fish/min
Operators	0 person
Fish Size	2-8 kg
Weight Approx.	130 kg
