

Belly trimmer

Trimming pork belly for maximum bacon product profit

To ensure a higher profit for bacon, pork belly's are automatically cut on two sides into a square figure. This results in a more uniform width of the sliced bacon products. The size of the square can easily be adjusted to needed width of the following sliced bacon.

Advantages

- High capacity 600+ bellys/hour
- Easy to operate
- Round knife cutting
- High level of operator safety

See video of the Belly trimmer on our website:

We create machine solutions that ensure production profitability

Woitech develop and manufacture innovative machine solutions for the food industry. Our focus is to add value to our customers Production line and ensure measurable profitability.

We are taking our customers through the project from the early stage where the need and ideas are evaluated to the integrated and commissioned machine. Our central focus is solutions that add value to our customers production, and we are never compromising quality aspects in our deliveries. We are aiming to create long and trustful relations and learn from our customers.

Pointed Below are some of the Benefits when choosing Woitech as machine solution supplier:

What

- Custom made machinery
- Product handling
- Conveyers
- Saw and cutting solutions
- Process machinery

How

- Hygienic Design
- Robots >IP67
- Vision technology
- Automation

Why

- Production atomization
- Energy reduction
- Process optimization
- Working environment
- Operator safety

We ensure maximum uptime by:

- Operational and technical training
- Remote support from Our office in Kolding , Denmark
- Planning service activities
- Quick onsite support
