

Meat & Poultry

Multi batcher

**Fully automatic weighing and batching
of large portions at high speed**

Our fully automatic multi batcher performs accurate high-speed combinatorial weighing and handles portion sizes of up to 30 kg of meat or meat by-products. The accurate weighing of batch sizes reduces give-away significantly compared to other systems and improves your return on investment.

The Cabinplant multi batcher is tailor-made based on product size and batch size according to customer request and available either as a stand-alone unit for automatic or manual bagging, box packing or filling into thermoformed packages, or as part of a complete packing line.

Cabinplant®

Automatic handling of large portions

Make the most of your raw product

Speed, flexibility and accuracy are key parameters to optimize your production economy. The Cabinplant multi batcher is developed on the basis of 40 years of experience within the food industry. The multi batcher is tailor-made to match individual requirements for handling of large portions or products.

Capacity

	MB10	MB30
Batch size max. litres	10	30
Hopper volum litres	10	20
Hopper size (LxWxH) mm	200x120x200	400x240x200
Throughput max. batches/min.	20	10 - 12

Dimensions mm

	MB10	MB30
Length	3400	3400
Height	2400	3000
Width	1550	1750

Dimensions may vary depending on type of use.

Advantages

- Accurate combinatorial high-speed weighing
- Reduced give-away (5 times less than other systems)
- Hygienic design - easy to clean
- Logic process interface - easy to operate
- Rapid change to other product by using recipe control

Application

- Poultry (bone-in or boneless)
- Meat (pork, beef)
- Fresh pelagic fish
- Frozen pelagic fish

Functionality

- Batch size from 2 - 30 kg
- Recipe control
- Data collection and statistics
- PLC control of equipment
- Capacity up to 20 batches/min. depending on batch size
